

Ray Burgos

Full-Stack & Mobile App Developer · Cartersville, GA

keymacro.dev@gmail.com [+1 561 591 2433](tel:+15615912433) (text only)

SUMMARY

Self-taught developer who designed, built, and shipped two production SaaS platforms solo — architecture through app store submission. Background includes two years of computer science coursework (Florida Atlantic University, not completed) and a completed degree in media/web design (Full Sail University), combined with 30+ years of high-volume kitchen leadership — the discipline behind actually finishing what gets built.

PROJECTS

KeyMacro.fit — AI-powered nutrition & training platform

keymacro.fit

- Built a first-party creator partner program — signed referral attribution at signup, an idempotent commission ledger reconciled from Stripe + RevenueCat webhooks with refund reversal handling, and a token-authenticated partner earnings dashboard requiring no account login
- Shipped an in-app educational hub — 15 lessons across 3 tiers with freemium gating and curated learning paths, rule-based content recommendations, contextual links from the Workout module, and a trophy/milestone system tied to lesson progress
- Solo-built cross-platform app — React/TypeScript PWA + Capacitor iOS/Android on Supabase — 203 React components, 17 custom hooks, 21 Deno Edge Functions, 44 Postgres migrations
- Hybrid AI architecture (OpenAI) routed server-side — zero client-exposed API keys — covering meal planning, computer-vision food logging, and AI coaching with persistent memory
- Unified Stripe (web) + RevenueCat (iOS/Android IAP) subscription system with database-level privilege guards
- Native integrations: iOS WidgetKit + Android home-screen widgets, HealthKit/Health Connect sync, Face ID/biometric app lock
- Production app scores 98 (Performance), 100 (Accessibility, Best Practices, SEO) on Lighthouse mobile audit

SlidePress — AI-powered social media content platform

slidepress.co

- Full-stack web app (Next.js 16, React 19, Supabase) with native iOS/Android apps via Capacitor

- Integrated Google Gemini, Fal.ai, and ElevenLabs for content, image, and voice generation
- Built OAuth publishing integrations with YouTube, TikTok, and Instagram, navigating each platform's formal developer review process
- Stripe + RevenueCat billing, webhook-driven entitlements, usage metering; submitted through App Store Connect and Google Play Console
- Production app scores 77 (Performance), 100 (Accessibility, Best Practices, SEO) on Lighthouse mobile audit

Personal Portfolio Site – Built and self-hosted, live on Vercel

www.rayburgos.com

- Designed and built a custom single-page site (no framework) with a distinct visual identity, responsive layout, and accessible markup
- Implemented technical SEO: Open Graph & Twitter card metadata, JSON-LD structured data, sitemap.xml, robots.txt
- Performance-tuned to Lighthouse scores of 99 (Performance), 98 (Accessibility), 96 (Best Practices), 100 (SEO) on mobile audit

TRANSFERABLE LEADERSHIP EXPERIENCE

30+ years leading teams of 6–10 in high-volume, high-pressure operations (kitchen management, hospitality). Vendor negotiation, cost/budget control, process optimization, training and mentoring, and maintaining quality under pressure — the same discipline now applied to shipping software independently.

EDUCATION

A.A., Media & Web Design (**Full Sail University**), plus two years of Computer Science coursework (**Florida Atlantic University**).
